- Basundhara R/A, Halishahar, Chittagong, Bangladesh.

A quick learner who can absorb new ideas and can communicate clearly and effectively. He is able to work alongside other talented IT professionals in creating software to the very highest standards. He is also expert in making and integrating APIs and Gateway. He has a good understanding of programming, can come up with plenty of innovative ideas. He is also able to play a key role throughout the development process to ensure maximum accessibility, customer experience and usability.

SKILLS

- PHP
- Laravel
- Codeigniter
- React JS
- Node JS
- Agile Development
- Redis
- Amazon EC2
- Project Management
- WebSocket
- Socket.IO
- MySQL
- API & Gateway Integration
- NGINX
- REST API Development
- PgSQL
- MariaDB
- Load Balancing
- Google API
- Web Design
- SEO
- Software Design
- Software Development
- WordPress
- GIT
- CI/CD
- SQLite
- HTML
- CSS
- Bootstrap
- JavaScript
- JQuery
- JQuery UI
- AJAX
- JSON
- CSS3
- Facebook API
- JavaScript Libraries
- Zoom Web SDK
- Adobe Photoshop
- Adobe Illustrator
- APACHE

CERTIFICATIONS

- 2016 - 2017
New Horizons Internet Professional Program
- New Horizons Computer Learning Centers

EXPERIENCE

MAY 2020 - PRESENT

SENIOR SOFTWARE DEVELOPER, TEAM LEAD

Comjagat Technologies Limited

- Have developed advance real-time applications in micro service architecture which is highly scalable. That saved 60% time of the whole team and gave 70% more efficiency for the team as well as the users.
- Have scaled the servers in such a way that it saved 70% costing each month.
- Developed frontend and backend of a micro service application. Created, managed and implemented APIs and gateways.
- Designed the software and its architecture. Defined all scopes, analyzed the requirements, estimated the projects and planned the release. Managed and distributed the tasks as needed between the team.
- Setup, maintained, scaled the servers & software. Load balancing when needed.
- Developed cross-browser and cross-platform compatible solutions.
- Troubleshoot, tested, debug and updated the technical problems of a software.
- Analyzed user requirements and converted requirements to design documents.
- Clearly and regularly communicated with management and support team.

Project: GOCON AGM

- GOCON AGM is highly scalable (virtual+physical) meeting and voting solution, with real-time broadcasting and voting for thousands of users at a time.
- GOCON AGM is designed in micro service architecture so that we can scale all part of the application depending on the load.
- Technologies Used: Laravel, React, Node, Socket.IO, Redis, Zoom SDK etc.

Project: GOCON ED

- GOCON ED is highly scalable broadcasting solution for thousands of users at a time. There are also presentation and recorded version of the program.
- GOCON ED is designed in micro service architecture so that we can scale all part of the application depending on the load.
- Technologies Used: Laravel, React, Node, Socket.IO, Redis etc.

Project: Dividend Calculation

- Shareholder stock and cash dividend calculation software with tax calculation.
- Auto filter tax category depending of shareholder data.
- Technologies Used: Laravel Horizon, Redis etc.

EDUCATION

2018 - 2020

BA/BSS

Bangladesh Open University

Grade: 2.75 out of 4.

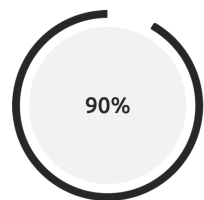

2013

Diploma in Computer Science

Basic Technical Training Institute

Grade: A+

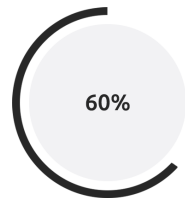

LANGUAGE

BENGALI

Native

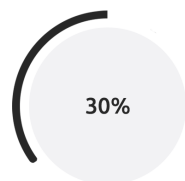

Reading, Writing, Speaking

ENGLISH
